

Community Pharmacy

Post X-Waiver: Improving Buprenorphine Access at the Community Pharmacy

Pharmacy CEU/MCBAP/CME/Social Work CEU credits approved

Meets 1 Credit for the DEA SUD Training Requirements

This knowledge-based session builds upon previous presentations reviewing the commonly encountered barriers to buprenorphine access at community pharmacies including key findings of the 2021 statewide pharmacist buprenorphine survey. The program will address common barriers including controlled substance management, knowledge deficits, and perceptions of stigma and diversion. Changes in buprenorphine availability related to removal of X-waiver and the revised DEA telehealth prescribing rule will be discussed. To initiate a change in practice and improve buprenorphine access, the discussion will include examples of specific strategies for resolution including effective communication with patients and collaboration with care team members. By participating in this program, pharmacists will increase their knowledge of buprenorphine for OUD, and willingness to provide OUD education and medication therapy in their community pharmacy practice.

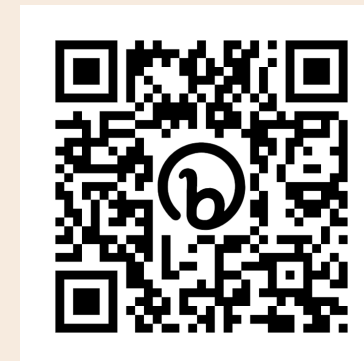

Presenter:

Victoria Tutag-Lehr, PharmD

Sept. 14

12 PM - 1 PM
